**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. Claims 1-22 are in the application.

***Drawings***

2. The drawings were received on 3/10/2008. These drawings are approved.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 21 there is no proper antecedent for “the wing sail”.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-4, 7, 10-11, 14, 20, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ikuo et al ( EP 903,288) in view of Meindl (1,049,856).

Ikuo et al discloses an unmanned vehicle generally as claimed, except for the specific use of hybrid propulsion means. Meindl discloses a semisubmersible vehicle and teaches providing the same with hybrid propulsion means including energy collectors 25 and energy stores 18 adapted to utilize at least solar energy and wind energy (sails 11). In view of these disclosures, it would

have been obvious to one having ordinary skill in the art to provide the vehicle of Ikuo et al with hybrid propulsion means generally as taught by Meindl.

The payload may carry any desired objects. The communication system can be modified in any desired manner. The provision of a hybrid propulsion means generally as taught by Meindl would have been desirable to add flexibility to the vehicle of Ikuo et al.

***Allowable Subject Matter***

7. Claims 5, 6, 8, 9, 12, 13, 15-19, and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

8. Applicant's arguments filed 3/10/2008 have been fully considered but they are not persuasive. Applicant argues that none of the references applied utilize hybrid propulsion means adapted to use wave or water current energy and particularly wave or water current energy in combination with solar and wind energy. It is noted that in claim 1, the limitation "adapted for utilizing at least solar energy, wave or water current energy, and wind energy;" The propulsion system of Meindl uses solar energy (one of the three alternatives listed) and wind energy.
